## PROJECTS

### Notes Website (10/2025 - 10/2025)- [link](#)

A note taking website available on any device. It has authentication, authorization, cookie, and reset password functionality. Built with security and optimization in mind. Security includes Middleware, RLS, session-based cookies, input validation, SQL injection protection, auto-deletion of notes when a user is deleted, and server failure warnings. Tech stack: React.js, DaisyUI, TypeScript, Express.js, and Supabase.

### Workflow Maker (03/2023 - 03/2023)- [link](#)

Developing an interactive Workflow Builder using React Flow with dynamic node linking and drag-and-drop functionality for internal process visualization.

### Fruit-cream Business Website (10/2025 - 10/2025)- [link](#)

Developed a website for fruit-cream seller. From planning to development, I handled the entire process end-to-end. This project helped me sharpen my skills in: Web development, UI/UX design & animations, SEO optimization, Page performance tuning, Google Search Console analytics, Sitemap setup.

### Personal Portfolio Website (03/2023 - 03/2023)- [link](#)

I have developed a responsive personal portfolio website developed using bootstrap and equipped with API to get E-mails from visitors.

## EXPERTISE

### Full Stack Developer

Gurgaon, Haryana | Feb,2025 – present

Currently working as Full stack Developer intern in Futurionic. I made valuable contributions in React.js, PHP development. Optimized page performance and load speed, ensuring smooth interaction and scalable frontend-backend communication.

## TECHNICAL SKILLS

Frontend: React, Tailwind CSS, Typescript, page performance, Api Integration.

Backend: Express, SQL, PHP, Rest API, JSON.

Database: XAMP, MySQL, Supabase.

Tech-Focused: SEO, Google Search console, Sitemap, Git, Github.

## CERTIFICATES

### React - The Complete Guide 2025 (incl. Next.js, Redux)- [link](#)

Udemy | March,2025 – May,2025

This course helped me to learn advanced topics of react like- State management with Redux, React optimization with useMemo, useCallback, Hooks, useState, useEffect, custom hooks. Some of projects I made are tic-tack-toe game link and Investment Calculator link.
